

**Kolb Road: Connection to Sabino Canyon Road
Public Meeting; Wednesday, Feb. 10, 2010
Van Horne Elementary School
Comment Transcription**

What expectations do you have for the streetscape experience in terms of landscaping and pedestrian amenities?	Are there significant neighborhood qualities/unique aspects that should be expressed in the public art?	What suggestions might you have to help make this the best possible project within the project's parameters?	What aspects of tonight's meeting were most helpful, and what suggestions can you give to improve the public involvement process in general?	General Comments	How did you hear about the meeting?
Decomposed granite and drought tolerant plants.	Since it's close to the park, maybe sports or children or typical desert theme.	Just build it.	Information about what is expected and status of project.	This is a much-needed road and I look forward to using the finished road.	Mail.
Prefer little or no street lighting. Vegetative and/or public art would be very nice.	Indian Ridge Estates is next to a UA archeological dig. Could some replication of artifacts in tile or mosaic be done?	Right turn lanes into Indian Ridge Estates from Sabino Canyon Road going south. Open the Potawatami Drive street access to Tucson Community College so Indian Ridge Estates people can use the Camino Principal light.	Very good presentation in general. Explanation about traveling the landfill was particularly helpful.		Good.
		Improve the left turns for bicyclists from southbound Sabino to eastbound Tanque Verde and eastbound Tanque Verde to northbound Sabino. 1. Dedicate a left turn lane for cyclist. 2. Green Bike Box 3. Seek out public input from cyclist – feel free to contact me.			
				Answers entered in a form from Sept. 10, 2009 PIM 2. I would like noise/light pollution from the roadway to be the key attribute of the completed project. 3. Yes I would use the roadway connection to Kolb Road to get out of my development. 6. My expectations for the public process is communication and by way of meetings. 7. I heard about the meeting through a mailing.	
			Fewer acronyms. What is Psomas, HDR, SCS, etc.	A project that is long overdue.	Mail.
That it represents the southwest.			Information presented.	Yes, do summer meetings as information is ready to be presented to the public. Suggest speakers don't stand in front of the screen preventing us from seeing the presentation.	Mailing post card and Web site.
				Are the terms "Geotech" and "DCR" known by your audience? I do not want overhead roadway lighting. I do not want the mountain view blocked.	Arizona Daily Star.
Spend dollars on reducing noise instead.	Don't waste dollars on expensive art/streetscape. Spend it on reducing noise.	Reduced traffic speed to lower road noise. Noise screening wall between roadway and residential neighborhood west of SCE. Limit max weight capacity (no large/commercial trucks) on SCE.			Mail.
Pedestrian access to/from park and to walkway along east side of wash. Connecting to sidewalks on Kolb. Least impact on wildlife in/around wash.	Functional art – seats.	Bridge to landfill. Try not to disturb wildlife during construction – coyote family, hawks, "buzzards", rabbits, snakes, lizards, etc. Accommodate u-turns northbound Kolb at new intersection back to southbound Kolb.		Ok to have meetings in summer.	Postal mail sent to place of business.
Please actually walk it! Pedestrians crossing at Tanque Verde and Sabino Canyon right now is horrible. Biking that intersection scares me so I usually walk my bike through as a pedestrian. I think red light cameras are great! More of them!	Plants and animals are always nice. Please no fake Saguaros, though!	Separate pedestrian-bike walk is good. That traffic will be too fast for comfortable bicycling.	Format with presentations and written questions was good.	Summer meeting ok but not Labor Day week, July 4 week nor Memorial Day week! No street lights!! Udall Park just increased their light pollution this past year. This area needs less light pollution, not more.	Postcard.
Put a fisherman at Pantano Wash crossing to catch the sand trout on Tanque Verde by Golf-n-Stuff. Then we can have 2 worthless public art projects in the area.	Project will not directly affect my neighborhood so I will defer to residents who will be.	Complete construction at Sabino Canyon and Tanque Verde as soon and quickly as possible in Summer of 2011. Do not do in street "art". River and Oracle area had baby bottom smooth pavement. "Art" was cut into road and is now bumpy.	You did a fine job explaining the hows and what's of the project.	As is true of too many road projects, this should have been done when Kolb was extended north of Speedway years ago (yes I remember when it dead ended there).	Mailing and Alan Kath's traffic reports.
